## **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: No prior art teaches a system having the same combination of elements as claimed in the independent claims 1, 8, 10 and 13. Take the broadest claim 8 as an example, no prior art teaches a motor control apparatus comprising: (1) a position detecting portion for detecting a position of a motor for driving an inertia mass; (2) a speed calculating portion for outputting a motor speed signal; (3) an inertia variation restraining portion for outputting a new torque reference; (4) a torque control portion for controlling a torque; (5) a phase compensating portion for outputting a new speed advancing a phase; and (6) a speed control portion for inputting the torque reference by inputting a difference between a speed reference and the new speed.

The International Search Report indicates that claim 1 reads onto JP 10-295092A reference. A careful examination, the examiner has noted that the JP reference does show a motor control apparatus having: (1) a position detecting portion 11 (see JP reference Fig. 8, same hereinafter); (2) a speed calculating portion 11; (3) a position control portion 12; (4) a torque control portion 7; and (5) a speed control portion 5. Based on the drawings and the abstract, it appears that the JP reference at least does not show either one or both of "an inertia variation restraining portion" and "a phase compensating portion".

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably Application/Control Number:

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bentsu Ro whose telephone number is 571 272-2072. The examiner can normally be reached on WS08605.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lincoln D. Donovan can be reached on 571-272-1988. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
